

THERMAL SOLUTIONS

Rehm Anlagenbau belongs to the internationally leading suppliers of soldering systems and thermal system solutions for electronics industry. With precise, innovative, reliable systems and an intelligent software we supply custom-made solutions for different fields of application in the modern electronics production.

V7 3.8	11 zones, 3800 mm (150 in) heating length, triple peak
V7 3.3	7 zones, 3300 mm (130 in) heating length, double peak
V7 2.6	6 zones, 2600 mm (102 in) heating length, double peak

Vision7.1 - Ideal for midrange production

- The Ideal system for midrange applications
- Optimized Heat Transfer
- Lateral Profile $\pm 2K$
- Reliable Process for lead-free soldering

Features :

- Long Life Motors
- High temperature resistant
- Stainless Steel process chamber
- Efficient insulation
- Highly efficient heat transfer
- Standard centre board support
- User-friendly menu guidance
- Superior quality of materials and construction
- Excellent heat transfer
- Lead free and Flip chip proven
- Robust and precise conveyor system
- High efficient Residue management in all process zones
- Low nitrogen consumption, low power consumption
- Individual Temp setting (P1,P2,P3) lowers delta T
- 3-stage condensation trap consisting of 3 water cooler and 2 stainless steel mesh filter
- Small delta T on board, high process capability

Other Products:

- Convection Soldering System
- Condensation soldering system
- Selective Soldering System
- Thermal System Solution
